

# Policy

## Applicable Publications / Reference Material

- A-GG-040-004/AG-001 Hazardous Material Safety and Management Manual
- Products List

# Legislation

## Applicable Legislation

- Canada Labour Code, Part II
- Hazardous Products Act
- National Fire Code of Canada
- TDGA and TDGRs

## Handling

### Pre-Use

Before handling HAZMAT in the workplace:

- SDS available
- Personnel familiar with SDS
- Labelling
- Emergency procedures
- Personnel trained – emergency procedures

### Shipping

# General Requirements

- Store separately from other material
- Proper storage facility
- Separate incompatibles
- Segregate by hazard class
- Ventilation – passive vs. mechanical
- Protection from the elements
- Secondary containment
- Separate HAZMAT and hazardous waste
- Container condition
- Separate New Product and In-Use Product
- Keep containers sealed
- Follow HAZMAT storage requirements
- Appropriate PPE
- Spill response capability close by
- Maintain an HAZMAT inventory
- Housekeeping

## Compatibility Chart

RTMD TDGR	2.1	2.2	2.2 (S.1)	2.3	3	4.1	4.2	4.3	5.1	5.2	6	8 acid(c)	8 base
2.1	=												
2.2	C	=											
2.2 (S.1)	X	C	=										
2.3	X	C	1m	=									
3	C	C	X	X	=								
4.1	C	C	X	1m	C	=							
4.2	1m	C	X	1m	1m	1m	=						
4.3	FDS SDS	C	X	FDS SDS	1m	FDS SDS	FDS SDS	=					
5.1	X	C	C	1m	X	X	X	X	=				
5.2	X	C	X	X	X	X	X	X	X	=			
6	X	C	1m	FDS SDS	FDS SDS	FDS SDS	FDS SDS	FDS SDS	1m	X	=		
8 acid(c)	X	C	X	1m	1m	1m	1m	X	X	X	1m	=	
8 base	X	C	1m	1m	1m	1m	1m	X	1m	1m	1m	1m	=

### Legend

C = Compatible - may store together  
 SDS/FDS = Safety Data Sheet - refer to Safety Data Sheet  
 1m = Incompatible - separate by minimum 1 m horizontal distance (Article 3.2.7.6.)  
 X = Incompatible - do not store together in same fire compartment. Separate by minimum of 3 m when in an outdoor storage area. (Article 3.3.4.3.)

### Légende

C = Compatibles - peuvent être entreposés ensemble  
 SDS/FDS = Fiche de données de sécurité - voir la fiche de données de sécurité  
 1m = Incompatibles - séparer par un minimum d'un mètre de distance horizontale (Article 3.2.7.6.)  
 X = Incompatibles - ne pas entreposer ensemble dans le même compartiment à l'épreuve du feu. Séparer par une distance minimum de 3 m lorsqu'entreposé à l'extérieur (Article 3.3.4.3.)

# Storage Examples

# Issue

- Products intact
- Properly labeled – TDG/WHMIS
- Contingency measures in place
- SDS available
- Placards

# Use

To use HAZMAT, personnel must:

- be trained to use the product;
- use PPE; and
- know and understand workplace emergency procedures.

\* = Mandatory Input

### Section Identification

- Holdings information will be identified to the Section level.
- If you know the UIC for the Base and Unit, this may also be entered.
- If you know the Supply Account Code for the Section, this may be entered.
- The business rules treat entities such as Base Supply and Base CE Section as **Units** even though they do not have a distinct UIC from their Base.

**Contact Name** - consists of Rank, First, Last, Phone (Other contact information will be captured in HMRA, such as e-mail, full address).

**Date** - Date Holdings for storage area was completed. This is used to determine when products were entered into use in a Storage Location.

### Location Data

**Building Name** - Enter if there is an official or Common Name for building. Do not use Unit name for identification.

**Building Number** - A building must have either a locally assigned Building Number and/or a Building Name which is recorded in CE facilities information. Street address will be included in final functionality.

**Room Name** - This refers to the room function such as Workshop, Laboratory, Carpenter Shop, Engine Bay. Avoid using a Section designation for naming a Room.

**Room Number** - Enter Room Number if it exists.

### Product Identifier Data

**Storage Location** - Enter Storage Location Name and Number, if exists. Examples: "Locker 2", "POL Shed", "Cleaning Stores", "Paint Stores", "HAZMAT".

**Supplier** - Enter Supplier Name.

**Brand Name** - Enter Brand Name. If product known to be in several forms add this to description. Example: WD-40 Aerosol, WD-40 Liquid. If the Product is a kit, a separate entry should be made for each part of the kit. Example "Epoxy Glue - Resin" & "Epoxy Glue - Hardener".

**Reference Numbers** - Add any part numbers found on container separated by a semi-colon (;).

**Stock Code** - Enter NSN(s) if known.

### Holdings Data

**Count Actual** - Add actual quantity of material on hand.

**Max Quantity** - Enter Maximum quantity of largest container of product that can be held in Storage Location.

**Container Size** - Numeric - Add container size of largest container of product held in Storage location.

**Container UoM** - Enter Container Unit of Measure, preferable kg (kilogram) for Gases, Solids and Articles; L (litre) for Liquids and Pastes. Other metric and Imperial Measures can be added here, but will be converted when rolled into HMRA Holdings.

**Container Type** - Enter the container type "Bottle", "Drum", "Can", "Aerosol", "Box", "Kit".

**HMRA ID** - Enter if known.
